

Knowledge Base

Integrated drug and medical information system

High quality patient care is at the centre of the new pharmacy contract. A contributing factor is the pharmacy's ability to provide patients with information that will help them to understand their condition, take their medication effectively, and encourage a healthy lifestyle.

There are four types of information within Knowledge Base:

- **Education** – Patient-friendly information covering medicines, conditions, health awareness and travel related healthcare advice
- **Medicines** – Clinical information for pharmacists and pharmacy technicians
- **Updates** – Pharmacy and medical journal articles
- **Services** – Contact details and information about self-help and support groups

Knowledge Base is updated daily from numerous information sources including:

- Patient UK
- World Health Organisation
- EMC
- The Cochrane Library
- Chemist and Druggist
- Pharmacy Magazine
- P3

Knowledge Base gives pharmacists and pharmacy technicians the healthcare information they need to support the following new contract services:

- Dispensing
- Medicines Use Reviews
- Signposting
- Encouraging Self-help
- Promoting Healthy Lifestyle

Call us on 0844 630 2002 (option 1) or e-mail leadsales@cegedimrx.co.uk for more information on all Cegedim Rx products and services.

Every Pharmacy Manager system now includes Knowledge Base as standard. It is an extremely comprehensive drug and medical information system that provides pharmacists with the ability to give their patients reputable information. Knowledge Base can either be used as an integrated part of the dispensing process where information is shown that is relevant to the item being dispensed, or as a fully searchable source of reference material.

The comprehensive electronic library includes easy-to-read information for patients as well as clinical details for pharmacists and technicians, including monographs, manufacturers' PILs and SPCs, lists of excipients, and pharmacy and clinical journal articles.

Knowledge Base contains continually updated healthcare information including:

- Illustrated advice and information about disease, illness and injury
- Drug information leaflets
- Self-help and support groups
- Travel advice – disease and country based.
