

Repeat Rx

Repeat prescription and delivery service management

It is estimated that more than 70 percent of prescriptions are issued on a repeat basis, a significant proportion of your business.

Repeat Rx is an optional module that integrates with Pharmacy Manager and utilises its information to help you manage your repeat prescription collection and delivery service. It is designed to improve your efficiency.

Managing Repeats

When patients register with the system, they authorise you to request repeat prescriptions on their behalf. This means you have the opportunity to dispense all of your patients' repeat prescriptions.

If a patient prefers to continue to request their own prescriptions, Repeat Rx will prompt you to remind them when it is time to request their prescription.

Repeat Rx then tracks your repeat prescriptions from the time they are requested to the point they are issued to your patients, so you can see each day's tasks at a glance.

GP Reviews

Repeat Rx also monitors your patients' GP review dates and lets you know when these dates are approaching, and by ensuring that repeat prescriptions are requested and issued at exactly the right time you will help your patients to be more compliant with their medication.

Features and Benefits

Patient Recruitment

- Generate patient and doctor letters
- Generate patient consent forms

Requesting Prescriptions

- Once a patient is registered, Pharmacy Manager will calculate when the next prescription is due, based on the drug quantity and dosage
- Repeat Rx automatically tells the pharmacist which patients are due for a repeat prescription
- Send an automatic request for the prescription to the GP by letter, fax or telephone
- If preferred the pharmacist can select to remind the patient to request a prescription
- Review a patient's entire drug record
- Check the status of a prescription

Dispensing Prescriptions

- Repeat prescriptions will be dispensed in the same way as any other prescription
- All repeat dispensings are linked to the Pharmacy Manager database so that all potential contra-indications or interactions will be detected
- The pharmacist can check the status of each requested prescription

Collection or Delivery

- Optional delivery status tracking
- The patient can choose whether they would like to collect the prescription or have it delivered
- The system provides a full audit trail so that the pharmacist can provide evidence of the movement of the prescription
- A letter is printed to be signed by the patient to confirm delivery
- Forms are printed to confirm exemptions and customer deliveries

Call us on **0844 630 2002** (option 1) or e-mail leadsales@cegedimrx.co.uk for more information on all Cegedim Rx products and services.
