

We have opportunities for **Mid-level Developers** (React .Net Core) to join to join our amazing and innovative R&D team to drive software delivery against an exciting new green-field product portfolio.

We are a talented and collaborative team who are focussed on building great technology that delights our customers. We're designing a suite of integrated products and services to drive efficiencies in the pharmacy environment.

This Full-Stack Development role will see you working on our new product portfolio using the latest technologies; you'll be working in one of our feature teams, namely Pharmacy Intelligence and Efficiency, Pharmacy Dispensing Services or Stock & Order Management, who are focused on transforming the world of Pharmacy with ground breaking, time saving solutions.

This is an excellent opportunity for the right candidate to make their mark on our new flagship product.

What will you be doing

The role will see you working on our new exciting green-field product portfolio and a range of new features. We're evolving our existing products to provide our customers with ground breaking, time saving solutions.

You will work across the specification, detailed design, coding and testing on new developments, as well as enhancements. You'll also be actively involved in solutions design, design workshops and code review, as well as participating in Agile Scrum stand ups, reviews and retrospectives.

The person we need

We're looking for experienced Software Developers with React and .Net Core coding experience. Someone with a genuine interest and enthusiasm for quality solutions and development.

You will be comfortable learning/applying new technologies, and with expressing new ideas to help drive innovations.

Team work and collaboration is vital to the success of the project, so you'll have excellent communication and interpersonal skills. You'll have prior commercial experience with:

- React, React Hooks
- HTML5, CSS and Typescript/JavaScript skills
- C#/.NET Core Microservices
- Design Patterns, GoF, MVC, MVVM
- Web Services, REST, XML, JSON
- Databases – PostgreSQL, MSSQL, Oracle, MySQL.

If you have any experience of; Docker/Kubernetes, Atlassian, UX principles, working in Agile Scrum it would be very beneficial, but it's not essential.

What we can offer you

It's an excellent opportunity to have a key role in the delivery of our new flagship product, using the latest technologies and tools.

You'll be joining our friendly and focused team; we have a culture where everyone pulls together, we're really passionate about the solutions we deliver and the positive impact they have on healthcare services all across the UK.

We're offering a competitive salary with a superb range of employee benefits - including matched pension, health cash plan and a well-being allowance - plus personal development and opportunities for your career progression longer term. Our teams enjoy a variety of work-related events as well as regular social activities in and out of the office.

Permanent, full time, 35 hours/week Mon-Fri, flex home/office working (Office HQ: Leyland, Lancs, UK)

Up to £50k DOE plus our excellent benefits package

If this is just the role you've been looking for, please [apply now](#) with an up to date CV, thank you.

(Please note: visa/sponsorship is not being offered, so you do require full right to live and work in the UK before applying)
