

### **Experienced Software Trainers** (freelance contract)

Due to new clients coming on board along with new products and enhancements across our portfolio, we're looking for a number of trainers with existing PMR or software training experience to deliver PMR user training to community pharmacies across England.

Although it would be ideal if you have PMR training experience already, we'll happily look at experienced software trainers with the ability to learn and deliver user training on our pharmacy solutions.

#### **What's involved?**

As new pharmacy customers come on board (anything from small independents to national groups) or existing pharmacies upgrade, PMR user training is delivered as part of the service level agreement. Users are a mix of Pharmacists, Dispensers, technicians and the wider pharmacy team all with different levels of PMR knowledge and experience. You'll deliver training 1-on-1 or to teams of various sizes, ensuring they fully understand its functionality and capabilities and get the most from the PMR software.

#### **What are we looking for?**

At least one person to cover each of the following areas across England:

North East

North West

Midlands

South West

South East

London

with

- PMR software training experience
- Experienced Software Trainer
- A confident, outgoing and friendly personality
- An excellent communicator with great people skills

#### **Other info**

- Monday to Friday
- Day rate of £255 when training and £125 whilst being developed into a trainer
- Travel, accommodation and other expenses all paid

If you'd be interested in joining our team, please [apply now](#) with an up to date CV and contact details, thank you.
