

**Software Trainers** – with pharmacy experience (freelance contract)

Do you have experience working within community pharmacy - looking for a change of career but wanting to stay within the healthcare sector? Then we could have your perfect role!

Due to new clients coming on board, along with new products and enhancements across our portfolio, we're looking for a number of people with strong community pharmacy and PMR software experience to deliver PMR user training to community pharmacies across England.

Although it would be great if you've had some training experience it's not essential as it's your knowledge of pharmacy and pharmacy software we're interested in and your ability to become a trainer – something we'll happily develop you into.

**What's involved?**

As new pharmacy customers come on board (anything from small independents to national groups) or existing pharmacies upgrade, PMR user training is delivered as part of the service level agreement. Users are a mix of Pharmacists, Dispensers, technicians and the wider pharmacy team all with different levels of PMR knowledge and experience. You'll deliver training 1-on-1 or to teams of various sizes, ensuring they fully understand its functionality and capabilities and get the most from the PMR software.

**What are we looking for?**

People with strong experience within pharmacy and PMR software.

At least one person to cover each of the following areas across England

North East  
North West  
Midlands  
South West  
South East  
London

If you have previous training experience then great, however we're happy to develop people with the right personality, approach, communication skills and PMR knowledge who have a passion to move into training:

- PMR software and pharmacy experience
- A confident, outgoing and friendly personality
- An excellent communicator with great people skills
- Previous training experience in some form would be ideal, but definitely isn't essential

**Other info**

- Monday to Friday
- Day rate of £255 when training and £125 whilst being developed into a trainer
- Travel, accommodation and other expenses all paid

If you'd be interested in joining our team, please [apply now](#) with an up to date CV and contact details, thank you.
