

Are you a highly experienced, hands-on DevOps professional, passionate about the adoption of DevOps and Cloud services?

We're looking for a **Director of DevOps** to take on a pivotal role in our journey in the adoption of the Cegedim Cloud across our UK group of businesses, as well as with external private and public sector organisations, innovating the healthcare IT market.

You will lead on DevOps strategy, driving new and existing DevOps initiatives, effectively communicating with our development and operations teams to orchestrate the creation of new SaaS solutions at scale within healthcare. You'll also provide direction and management for our UK Cloud, Internal Systems and Security teams.

We're looking for

A self-motivated individual and confident communicator able to build strong collaborative working relationships. Leading from the front you'll inspire and engage those you're working with. You're highly organised with an eye for detail and excellent time management. You have:

- Proven experience in leading in DevOps and Cloud environments
- Managerial experience in Information and Cyber Security
- A strong understanding of networking concepts, configuration management tools
- Familiarity with continuous integration tools, scripting languages such as Python or Javascript
- Understanding of System Administration in Microsoft Windows environments
- An ability to drive to goals and milestones while valuing and maintaining a strong attention to detail
- Excellent judgement, analytical thinking and problem solving skills

If you have any prior experience of delivering a SaaS product, understanding of micro-services or related architectures, and knowledge of containerisation technologies this would be beneficial, as would CISSP or AWS DevOps certification.

French language skills (spoken and written) are desirable, but it's not essential.

What this opportunity offers you

A highly influential role where you will have real impact, leading on DevOps and Cloud for our group and clients. You'll be taking DevOps and the Cloud forward in the UK, establishing and evolving a traditional Infra team into a modern DevOps team and environment.

You'll be part of our friendly, professional and focused team. We promote a culture where everyone pulls together; we're really passionate about the solutions we deliver and the impact they have on healthcare services all across the UK.

We're offering a competitive salary with an excellent range of employee benefits - including matched pension, health cash plan and a well-being allowance.

Other information

This is a permanent, full time position.

Salary/package: £90-110k base DOE + 20% bonus + car allowance along with our employee benefits package.

Location: Ideally you will be based in or around the Greater London area however flexibility across the UK will be considered for the right candidate. The role will be home-based with requirements to travel to office and platform site locations in the UK (Battersea office is HQ for this role), as well as to France.

Please note: Security clearance will be required in the future due to working agreements with the MoD.

If this is just the role you've been looking for, please [apply directly](#) on our recruitment portal or email any queries to our recruitment team [here](#), thank you.
